

# MOHAMMAD SALAUDDIN, 24

CAUSE AS PER DEATH CERTIFICATE: CARDIAC ARREST

Mohammad Salauddin had gone to Qatar in 2018, leaving his newly married and pregnant wife Madina in Nepal. He worked as a cleaner for Life Style For Cleaning and Maintenance, earning QR900 (US\$250), according to his employment contract.

One day in April 2021, he went to the washroom to launder his clothes and never returned, according to colleagues who found him on the floor and reported his death to his family.

His pre-departure medical examination report stated that he was physically and mentally "fit" with a normal clinical impression. His family still has not received any compensation from the employer. His wife Madina and mother Nunu are confused about the circumstances of his death. They received Saluddin's body two weeks of his death.
